This document specifies the protocol implementation extra information for testing (PIXIT) of the IEC 61850 interface in the client system: IPCOMM ipConv, IEC 61850 Client, further referred to as “client”.

Together with the PICS and the MICS the PIXIT forms the basis for a conformance test according to IEC 61850-10.

The following chapters specify the PIXIT for each applicable ACSI service model as structured in IEC 61850-10 and the “Conformance Test Procedures for Client System with IEC 61850-8-1 interface”.
